

Abundant Nexus Conference

The Convergence of MEMS Technology, Entrepreneurism & Abundance

Wednesday April 24, 2024 | Computer History Museum, Mountain View, CA

Sponsorship Opportunities

Dr. Janusz Bryzek passed away just one year ago in November 2022. Janusz was a pioneering force in the world of micro-electromechanical systems (MEMS) and left an indelible mark with his relentless commitment to innovation. He embarked on an inspiring journey that saw him commercialize 11 companies, revolutionizing MEMS applications from pressure sensors to ultrasonic imagers. Driven by unbridled optimism, he envisioned the widespread availability of low-cost MEMS devices, believing they held the key to improving lives across the globe.

The [Abundant Nexus Conference](#) will celebrate Janusz' passions of MEMS, entrepreneurship, and abundance ... as well as remember Janusz and his contributions. It is a truly unique event in vision and scope. We are pairing this with the *Remembrances* reception on Tuesday April 23rd at Exo in Santa Clara which will be a more intimate affair focused on remembering Janusz. Sponsorships will help cover costs that will make these events possible and support accessibility to a wide range of participants. In addition, we will create a MEMS graduate award in Janusz Bryzek's name with any funds left over from the conference to give out at the Hilton Head Workshop in June 2024.

Don't miss the opportunity to support this unique celebration at the heart of the Abundant Nexus!
